

Using Nature for Meaningful Math Lessons Educator Workshop

FREE!!!

July 23th, 2015

9:00 am - 1:30 pm

(Lunch will be provided)

Elkhorn Valley Museum

515 Queen City Blvd, Norfolk

FREE!!

Nebraska Project WILD invites you to explore math using nature as your tool. From data collection and field experiments to active games, math can be fun and meaningful.

This workshop is targeted to 2nd through 5th grade.

Participants will receive:

- Knowledge and skill to supplement nature into the math lessons you are already doing in your classroom.
- An understanding of the importance of creating meaningful connections between nature and math for your students.
- Resources specific to nature based math lessons.
- Sample activity lessons and ideas.
- Lunch and Snacks.

Workshop limited to 20 participants

To register send you name, phone number, email and educational affiliation to Jamie.bachmann@nebraska.gov
